## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8, 9, 12-14, and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurz.

The Kurz reference discloses an internal substance delivery device (Figure 6) comprising a support frame 1, outwardly biased resilient arms (see col. 4, lines 40-44) which are capable of "interlocking" (see Figures 7 and 8), releasably receivable substance delivery means (the wound copper wire on the arms, see col. 4, lines 20-29), and a locator 7. Regarding claims 5 and 6, note that wire is flexible and has a round cross section). Regarding claim 9, see Figure 4.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kurz.

The Kurz reference discloses a device as discussed supra, but remains silent as to the material of the support frame. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the support frame from nylon, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In *Re Leshin*, 125 USPQ 416.

### ***Allowable Subject Matter***

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

Applicant's arguments filed 1/18/06 have been fully considered but they are not persuasive. Applicant argues that the Kurz device does not have "separate hormone releasing components (i.e. pods) that can be added as necessary to the arms of the device as independent units, wherein the pods are attachable and releasable during treatment". This argument is in reference to the claim language "wherein each resilient arm is capable of receiving and releasing a substance delivery means capable of releasing substance into the body cavity." The claims themselves do not recite "pods", and the claimed attachability and releasability are not required "during treatment". It is the Examiner's position that the wires wound around each arm in the Kurz device can

be considered "substance delivery means" which are "releasable" by virtue of being unwound from the arms while the device is outside a body cavity and that the Kurz device therefore reads on the disputed claim language.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
